Communications on

PURE AND APPLIED MATHEMATICS

CONTENTS

Volume VI, Nos. 1–4, 1953

NUMBER 1, FEBRUARY

FRIEDRICHS, K. O., Mathematical Aspects of the Quantum Theory of Fields—Part V 1

GERJUOY, EDWARD, Total Reflection of Waves from a Point Source . 73

DRESSLER, R. F., and POHLE, F. V., Resistance Effects on Hydraulic Instability 93

MORAWETZ, C. S., and KOLODNER, I. I., On the Non-existence of Limiting Lines in Transonic Flows 97

NIRENBERG, LOUIS, On Nonlinear Elliptic Partial Differential Equations and Hölder Continuity 103

NUMBER 2, MAY

GARABEDIAN, P. R., Oblique Water Entry of a Wedge 157

NIRENBERG, LOUIS, A Strong Maximum Principle for Parabolic Equations 167

CHEN, YU WHY, Flows through Nozzles and Related Problems of Cylindrical and Spherical Waves 179

LAX, PETER D., Nonlinear Hyperbolic Equations 231

DOUGLIS, AVRON, A Function-Theoretic Approach to Elliptic Systems of Equations in Two Variables 259

DOUGLIS, AVRON, Uniqueness of Cauchy Problems for Elliptic Systems of Equations 291

NUMBER 3, AUGUST

FRIEDRICHS, K. O., On the Differentiability of the Solutions of Linear Elliptic Differential Equations 299

JOHN, FRITZ, Derivatives of Continuous Weak Solutions of Linear Elliptic Equations 327

NIRENBERG, LOUIS, The Weyl and Minkowski Problems in Differential Geometry in the Large 337

NIRENBERG, LOUIS, *Addendum to* On Nonlinear Elliptic Partial Differential Equations and Hölder Continuity (Volume VI, Number 1, pages 103–156) 395

WHITHAM, G. B., The Propagation of Weak Spherical Shocks in Stars 397

KELLER, JOSEPH B., and WEITZ, MORTIMER, Reflection and Transmission Coefficients for Waves Entering or Leaving an Icefield 415

KAY, IRVIN, The Diffraction of an Arbitrary Pulse by a Wedge . . . 419

NUMBER 4, NOVEMBER

AMERIO, LUIGI, Extension of the Notion of "Saddle Point" to Systems of Two Differential Equations in Three Variables 435

AGMON, S., NIRENBERG, L., and PROTTER, M. H., A Maximum Principle for a Class of Hyperbolic Equations and Applications to Equations of Mixed Elliptic-Hyperbolic Types 455

STOKER, J. J., Unsteady Waves on a Running Stream 471

KELLER, JOSEPH B., Bowing of Violin Strings 483

JOHN, FRITZ, Two-Dimensional Potential Flows with a Free Boundary 437

KELLER, JOSEPH B., The Scope of the Image Method 505

BERS, LIPMAN, Univalent Solution of Linear Elliptic Systems 513

AUTHOR INDEX

Volume VI, Nos. 1–4, 1953

Agmon, S., *Nirenberg*, L., and *Protter*, M. H.: A maximum principle for a class of hyperbolic equations and applications to equations of mixed elliptic-hyperbolic types, 455

Amerio, Luigi: Extension of the notion of "saddle point" to systems of two differential equations in three variables, 435

Bers, Lipman: Univalent solutions of linear elliptic systems, 513

Chen, Yu Why: Flows through nozzles and related problems of cylindrical and spherical waves, 179

Douglis, Avron: A function-theoretic approach to elliptic systems of equations in two variables, 259

——: Uniqueness of Cauchy problems for elliptic systems of equations, 291

Dressler, R. F., and *Pohle*, F. V.: Resistance effects on hydraulic instability, 93

Friedrichs, K. O.: Mathematical aspects of the quantum theory of fields—Part V, 1

——: On the differentiability of the solutions of linear elliptic differential equations, 299

Garabedian, P. R.: Oblique water entry of a wedge, 157

Gerjuoy, Edward: Total reflection of waves from a point source, 73

John, Fritz: Derivatives of continuous weak solutions of linear elliptic equations, 327

——: Two-dimensional potential flows with a free boundary, 497

Kay, Irvin: The diffraction of an arbitrary pulse by a wedge, 419

Keller, Joseph B.: Bowing of violin strings, 483

——: The scope of the image method, 505

—— and *Weitz*, Mortimer: Reflection and transmission coefficients for waves entering or leaving an ice-field, 415

Kolodner, I. I.: see *Morawetz*, C. S.

Lax, Peter D.: Nonlinear hyperbolic equations, 231

Morawetz, C. S., and *Kolodner*, I. I.: On the non-existence of limiting lines in transonic flows, 97

Nirenberg, Louis: On nonlinear elliptic partial differential equations and Hölder continuity, 103; *Addendum*, 395

——: A strong maximum principle for parabolic equations, 167

——: The Weyl and Minkowski problems in differential geometry in the large, 337

——: see *Agmon*, S.

Pohle, F. V.: see *Dressler*, R. F.

Protter, M. H.: see *Agmon*, S.

Stoker, J. J.: Unsteady waves on a running stream, 471

Weitz, Mortimer: see *Keller*, Joseph B.

Whitham, G. B.: The propagation of weak spherical shocks in stars, 397
